ABOUT ME

Frontend Developer with 2 years of experience in building high-performance, user-friendly web interfaces. Proficient in modern web technologies and deeply knowledgeable in UX/UI principles. Previously worked at GoWare JSC and currently contributing to Intelin. Seeking advanced career opportunities in Frontend Engineering to further enhance my expertise and drive innovative solutions.

WORK EXPERIENCE

Frontend Developer

Intelin JSC

2024 - Present

• LocStock Project:

- Architected and maintained a scalable Design System using Next.js and Tailwind CSS, reducing development time for new features by 30% through highly reusable, accessible UI components.
- Engineered a high-performance ordering engine by leveraging React Query's advanced caching strategies, significantly reducing API overhead and ensuring sub-second UI responsiveness during peak traffic.
- Implemented a return management module, automating processing and providing real-time tracking for customer returns.
- Integrated a secure online payment gateway with Strike Api, ensuring compliance with industry standards and supporting multiple payment methods for enhanced security.
- Spearheaded the integration of Deep Learning-based image search, optimizing state management for complex asynchronous AI workloads and improving product discovery accuracy.
- Worked closely with backend engineers to integrate AI-driven functionalities via React Query and React Context, optimizing state management, API consumption, and data synchronization.

• VTM Project (Video Teller Machine):

- Developed mission-critical financial interfaces for VTM, ensuring 100% compliance with banking security standards for OTP authentication and real-time video banking.
- Collaborated with cross-functional teams to integrate complex Banking SDKs, optimizing data fetching patterns to ensure seamless performance in low-latency environments.

- **HRM Project (Human Resource Management):**

- Standardized the HRM platform's architecture using React Hook Form, leading to a 40% improvement in form validation efficiency and data consistency.
- Designed and implemented user interfaces based on business requirements and visual layouts provided through Figma designs, ensuring pixel-perfect alignment and high usability.
- Implemented developed feature leave request and management module, allowing employees to submit time-off requests, edit, delete and managers to approve or reject them. Digitized legacy HR workflows, reducing operational turnaround time by automating leave management and recruitment pipelines
- Developed essential features, including employee management, asset tracking, attendance tracking, job posting, recruitment post creation, and candidate profile creation.
- Actively collaborated with Business Analysts (BA) and was ready to adapt and refine system workflows in response to evolving client requirements.

GoWare JSC

Sep 2022 - Sep 2023

Play central role in rapidly develop core product:

- **Friend suggestion:** Utilize Ant Design, Scss to build app's frontend, integrate with provided RESTful API and manage data (Redux Thunk).
- **User post:** End-to-end implementation, design (Figma) to develop (ReactJS)
- **Live Learning:** Data visualization with Ant-Design-Charts component
- **Landing page:** Integrate with MOMO payment gateway, support animation, responsive design with NextJS

EDUCATIONAL HISTORY

Information Technology - Computer Science (Ton Duc Thang University)

- Software Architectural Design, Planning
- Machine-Learning Algorithms
- Natural Language Processing Science

SKILLS

- **Programming Languages & Frameworks:** JavaScript, TypeScript, ReactJS, NextJS
- **Styling & UI Libraries:** Ant Design, Tailwind CSS, SCSS
- **State Management:** Redux, Redux Thunk, React Context
- **API Integration & Data Fetching:** RESTful APIs, React Query
- **Development Methodologies:** Agile, Scrum, CI/CD
- **UI/UX & Prototyping Tools:** Figma, Storybook
- **Git**

LANGUAGE

- Toiec 610
